SKILLS

Hard Skills: HTML & CSS, JavaScript, ReactJS, React Redux, Tailwind CSS, Python, ExpressJS, MongoDB, NodeJS, Next JS, Typescript

EXPERIENCE

QA Engineer
LTIMindtree   December 2021 - March 2024, Bangalore
- Achieved a 30% reduction in product release cycles by optimizing quality assurance procedures, resulting in a 15% increase in on-time delivery.
- Led and directed a team of 10 interns to construct web applications using HTML, CSS, and JavaScript, driving project success.
- Directed Selenium-driven automated test script execution, leading to an impressive 60% decrease in manual testing workload through seamless cross-functional collaboration.
- Crafted 30+ test cases for a fashion website using exhaustive coverage of critical functionalities.
- Fostered robust cross-team communication by actively participating in daily stand-up meetings, facilitating query resolution, requirement clarification, and progress updates.

Web Developer
Exposys Data Labs   May 2021 - June 2021, Bangalore
- Executed the construction of a robust TODO App utilizing HTML, CSS, and vanilla JS, showcasing proficiency in front-end web development.
- Revamped interfaces with dynamic features, streamlining task management through efficient task addition, deletion, and updates. Realized a 25% productivity surge and seamless data persistence by integrating local storage.
- Spearheaded the creation of a responsive Weather App using HTML, CSS, and Vanilla JS to design interactive elements. Seamlessly incorporated an external API, OpenWeather, to provide real-time, location-specific weather data and further solidifying user satisfaction through intuitive search functionality.

PROJECTS

Employz | ReactJs, Supabase, Tailwind, Shadcn UI
- Developed a full-stack job board app using React for my front end and supabase for my database.
- Included Clerk for user authentication and authorization.
- Applicants can login and apply for jobs seamlessly, while recruiters can post job and keep track of applicants.

CineVista | React, Material UI
- Developed a movie portal for cinephiles, leveraging the TMDB API to enable users to browse and explore detailed info about their favorite movies.
- While initially challenging, I diligently reviewed various documentation to gain a comprehensive understanding on few topics of React.
- Proactively addressed this gap by **dedicating 10 hours** to diligently reviewing documentation and gaining a comprehensive understanding of the necessary topics.

Weather App| Next JS, Shadcn UI, Tailwind
- Developed a comprehensive weather app that fetches real-time weather data and displays various details likess temperature, UV Index, Wind etc.
- Implemented a high quality User Interface offering a convenient and personalized user experience.

EDUCATION

Bachelor of Engineering in Information Science
Sahyadri College of Engineering and Management · 2021 · 8.4 CGPA
